THE INCONVENIENT PROCESS OF FALLING

By Katie Neipris

Growing up is a strange process, and no one is exempt.

Seven childhood friends go camping together after their first year of college. Separated for several months and thousands of miles, they expected to have the same relationship as before. They could not have been more wrong.

Each character is an overachiever, driven by a defining characteristic -- a love of medicine, a love of books, a love of love -- and during that

first year of college, they've each lost a little bit of whatever that thing is. They're all experiencing some sort of identity crisis, and they're relying on their childhood friends to remind them who they used to be.

THE INCONVENIENT PROCESS OF FALLING describes the real struggle of growing up and accepting that life is not going to turn out exactly as planned. It depicts the coming-of-age experience of returning home and seeing how much you've changed. It's about friends coming together and old feelings colliding in unexpected ways. And it's about moments of extreme sadness bolstered by dark comedy, because sometimes laughing is the only way to deal with things.

Ultimately, THE INCONVENIENT PROCESS OF FALLING is a novel about realizing that friends are the family you get to choose.

Aimed at high schoolers and those experiencing quasi-adulthood, THE INCONVENIENT PROCESS OF FALLING will touch anyone who understands the desperation of trying to straddle the divide between childhood and adulthood.

Having written the novel while in college, the authenticity of author **Katie Neipris** is unmatched. Her honesty, sadness and humor reflect this age of transition, an age that has largely ignored by the literary world. Having

experienced her share of heartbreak over the course of finishing this novel, Katie Neipris realized how many people around her were going through something similar, or something worse. This novel was written during a time of extreme growth and extreme perspective-gleaning, and it is this, more than anything, that separates it from the crowd.

About the Author:

Katie Neipris has always loved writing. Born and raised in Seal Beach, California, she spent her childhood at the beach, playing softball, and reading everything she could get her hands on. Katie graduated Phi Beta Kappa from UCLA, where she studied English and Film, Television, & Digital Media. She spent summer 2012 studying abroad at Oxford and traveling around Europe, a life-changing experience that she credits with inspiring her to fully become a writer.

Katie currently works in film and television development, and is excited to continue writing for multiple formats. *The Inconvenient Process of Falling* is her first novel and she looks forward to writing many more.

Katie and her college roommates are still happily cohabitating in Los Angeles. They spend their time at the beach, watching movies, cheering on the Bruins, and getting into as many shenanigans as possible.
