DEAR ALUMNI AND FRIENDS,

If getting up close to the place that inspired Charles Darwin’s *The Origin of Species* is on your life list of travel adventures, then an expedition to the Galápagos is authentic wish fulfillment. You’ll have encounters with the endemic wildlife that lacks an instinctive fear of humans, explore a vibrant undersea, and observe diverse geological wonders from stark volcanic landscapes to lush, green highlands.

Galápagos is ideal for active exploration for guests of all ages and activity levels. Every day will deliver new adventures—kayak along rocky shores watching for passing sea turtles, snorkel with playful sea lions, hike lava fields crowded with basking marine iguanas, take a sunset Zodiac cruise around islands teeming with birdlife, or grab a paddleboard for an exhilarating, personal experience.

You will travel aboard the *National Geographic Endeavour II*, a 52-cabin expedition ship equipped with cool tools that let you experience the islands with all your senses. Share the adventure with an onboard certified photo instructor, an experienced team of Naturalists, and an undersea specialist who will enhance your understanding of this exceptional destination.

Make the most of your time and add an optional post-voyage land extension to Peru, exploring Machu Picchu, the Sacred Valley, Cusco, and Lima. I hope you will join us to discover these magical places. To reserve your space, please return the reservation form or call 310-206-0613 for more information.

Sincerely,

Christel Aragon
Director, Alumni Travel

Kevin McKeegan is Distinguished Professor and former Chair of UCLA’s Department of Earth, Planetary, and Space Sciences. He is an expert in the laboratory analysis of extraterrestrial materials and is one of only a few people who have had the privilege to hold samples of asteroids and comets, the Earth and Mars, and the Moon and the Sun. In recognition of his work on understanding processes occurring in the early solar system, the International Astronomical Union named an asteroid after him. In addition to specialty classes in geochemistry and cosmochemistry, McKeegan teaches broad subjects in the origin & evolution of the Earth to large audiences in general education classes and he can hardly wait to get to the Galápagos to see this famous place that inspired Darwin!

The power and relevance of our needs as humans to connect with nature cannot be underestimated. That connection is perhaps at its greatest level in Galápagos. The vast number of animals living in the Galápagos archipelago is a major reason people choose to travel to this remote part of the world. Where else on the planet can you get close to the wildlife in the context of no fear at all? This is a marvelous experience for the human spirit and the itinerary ensures that you will have it often—exploring the key islands in the archipelago and seeing the iconic species that make this region so unique.

You’ll come eye-to-eye with the famous giant tortoises roaming in the wild. Encounter blue-footed boobies nesting along a trail. Stand paces away from courting, red-throated frigatebirds. Watch your footing to avoid disturbing a sea lion lounging on a white sand beach. And swim with penguins, marine iguanas, and playful sea lions—experiences that can transform lives.

LIFE ABOARD NATIONAL GEOGRAPHIC ENDEAVOUR II

Completely refitted, christened, and launched in Galápagos in 2017, the National Geographic Endeavour II is a floating base camp for exploring the islands. The ship accommodates just 96 guests in 52 thoughtfully appointed outside cabins, including dedicated solo cabins, connecting cabins, and suites. With an expansive open-air observation deck and lavishly windowed throughout the public spaces, cabins, and suites, she ensures stunning views of the never-ending panorama and access to the natural world. Designed and equipped with the benefit of 50 years experience in Galápagos, she is the perfect platform for exploring these islands, with a fleet of onboard tools—snorkel gear for every guest, kayaks, and stand-up paddleboards for personal forays. National Geographic Endeavour II also carries a glass-bottom boat, granting everyone a window on the undersea, with a Naturalist aboard to illuminate the vivid life there.

THE HEART OF THE EXPERIENCE

The warmth, humanity, and dedication of the expedition team, officers, and crew are unequaled. The engaging Naturalists, many of whom were born and raised in the Galápagos, have a deep understanding of all aspects of the islands’ natural and human history, and are experts in ornithology, geology, zoology, the undersea, and conservation. Your time with them will greatly enhance your understanding of this remote archipelago.

A certified photo instructor is aboard to help you take advantage of the myriad photo opportunities. They are not only skilled photographers—trained to help you understand your camera and improve your skills—but also Naturalists who can guide you in capturing the incredible wildlife behavior on display right in front of you.
